1、Application

The NDC1-115~800 series of AC contactors (hereinafter referred to as contactors) have the AC 50Hz (or 60Hz) and the rated insulation voltage of 1000V, and are mainly used for the electric circuit with the rated working voltage of 415V/690 and the rated working current of 115~800A as well as the AC-3 utilization category for remotely connecting and breaking the circuit and frequently starting & controlling AC motors. They can be used as magnetic starters with the appropriate thermal overload relays to protect the circuit in which overload may occur.

ND C 1 – □ □ □ □ + □

- Optional accessories: Refer to 10.1 for details
- Voltage specifications: Refer to 4.2 for the detailed optional voltage specifications
- Coil type code: “AC” coil; “DC” coil; Wide voltage coil for “AC/DC”
- Main circuit pole types: “3” stands for 3 poles, not marked; “4” stands for 4 poles
- Rated current: Working current under the AC-3 category and voltage of 415V
- Design code: 1
- Product code: AC Contactor
- Enterprise code: “Nader” brand low-voltage electrical appliance

5、Working condition

1) Free from acidic, alkaline or other corrosive gases in the ambient air;
2) Temperature:
Storage: -60℃～+80℃;
Operating: -25℃～+40℃;
Maximum allowable temperature at the standard control voltage: -40℃～+70℃(note1)。
3) Altitude in the installation place is no more than 3,000m (derating is required in case of being above 3,000m);
4) The relative air humidity at the installation site should not exceed 95%. Condensing should be avoided in the working environment.
5) High temperature or high altitude environment capacity reduction:
High temperature or high altitude environment capacity reduction, according to the following data reference

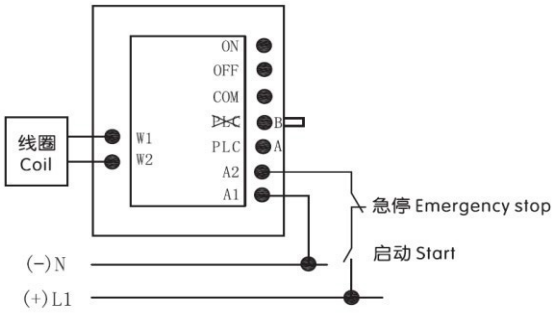
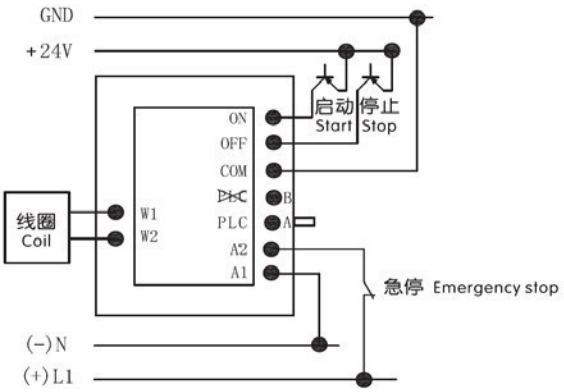
(1)Turn the dial switch to ~~PLC~~ B for control of power supply sides A1-A2, and perform control according to the control logic with the control diagram shown below:



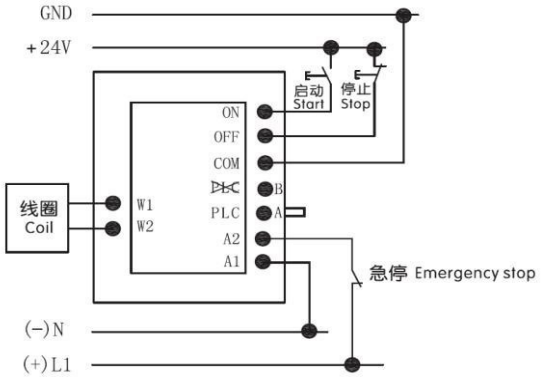
(2)PLC control

Turn the dial switch to PLC A with ON, OFF, COM connecting with PLC, and perform control according to the control logic with the control diagram shown below:

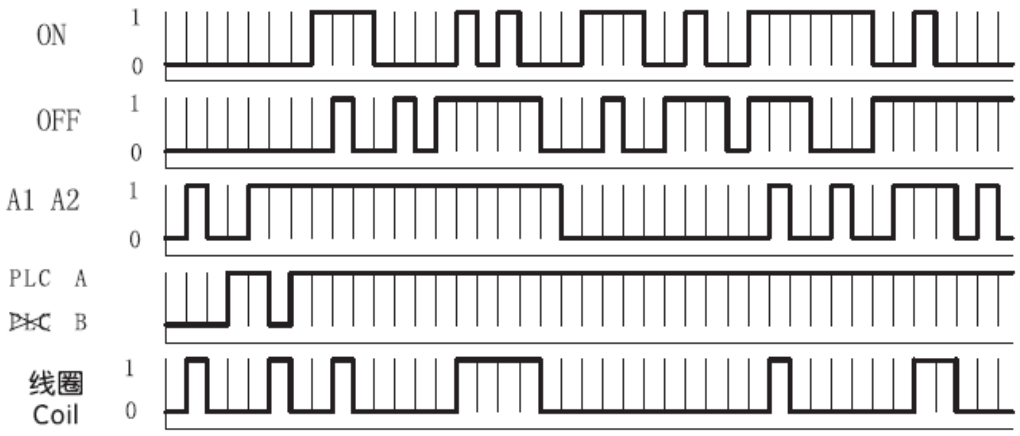
Note: PLC adopts the relay output type or transistor-source output type.



(3)Control of the active command appliance: Place the dial switch in PLC A with ON, OFF, COM connecting with the command appliance (button), and perform control according to the control logic with the control diagram shown below:



Control coil control logic wave form



Note：when on PLC B, ON or OFF status does not influence the coil, so omiting the logic wave form.

Bolt installation

9、Packaging and Storage

Each set of assembled product is packed in a case, which should be stored in a warehouse with the air ventilation and the temperature between -60℃ and +80℃. No acidic alkaline or other corrosive gas exists in the ambient air in the warehouse.

10 Accessories and Delivery List

10.1 Accessories

Contactor products are supplied with optional accessories. If accessories are not required, it is not necessary to select them. Currently, NDC1-115~800 series products can be installed with the following optional accessories:
Auxiliary contact NF1 series, reed type auxiliary contact F1-11DS/C1, delay auxiliary contact NS1 series.

G1 series coil surge suppression module

Type		Specification for coil voltage	Function
G1-R series (resistance capacity) Coil surge suppression module	G1-01R/C1-2650	AC24~48V	◆ Effectively protect circuits that are sensitive to "high frequency" interference. For sinusoidal voltage waveforms, where the total harmonic distortion is less than 5% ◆The maximum voltage is limited to 3 Uc and the maximum oscillation frequency is limited to 400 Hz. ◆The disconnection time is slightly increased (1.1 to 1.3 times the normal time).
	G1-02R/C1-2650	AC50~110V	
	G1-03R/C1-2650	AC127~240V	
	G1-04R/C1-2650	AC250~440V	
G1-K series (pressure sensitive) Coil surge suppression module	G1-01K/C1-2650	AC24~48V	◆ Effectively protect circuits that are sensitive to "overvoltage" interference. ◆The maximum transient overvoltage limit is 2Uc. ◆The disconnection time is slightly increased (1.1 to 1.5 times the normal time).
	G1-02K/C1-2650	AC50~110V	
	G1-03K/C1-2650	AC127~240V	
	G1-04K/C1-2650	AC250~440V	

10.2 Ordering and delivery list

The following information shall be provided during ordering:
A full range of models and specifications, ordering quantity.
For optional accessories, add the accessory specifications before the body model specifications.
Example: NDC1-630 AC220V 50/60Hz+NF1-22, 10 sets.

The product delivery list contains the following information:

NDC1-115~500 product:
Product body×1, grounding screws of the main circuit×6sets, rounding screw ×1 set, user manual ×1.

NDC1-630, 800 product:

Product body×1, grounding screws of the main circuit×6sets, rounding screw ×1 set, phase insulated partitions ×4, user manual ×1.

If provided with optional accessories, the default accessories will be installed on the contactor body.

Each set of connection bolts of the main circuit includes:
bolt (M12) ×1, spring washer ×1, plain washer×1, nut ×1.
Each set of grounding bolts includes:
bolt (M12) ×1, plain washer ×1.

11 Precautions

1) The installation site of the product should not be shaky or vibrant.
2) For vertical installation of the product, the gradient between the installation surface and the horizontal plane is no more than ±5°;
3) Reliable cabling is required to prevent the terminals from being burnt out due to abnormal heat at the terminals; therefore, regular maintenance is necessary;
4)In the course of use, after a certain number of turn-on and segmentation operations of the silver contact of the contactor, the surface of the silver contact surface will be singed or blackened. This does not affect the use, and it should not be polished. Otherwise, the contact life would be reduced. When the contact is affected.
